

DiscoveryPak™ Stem Cell Fate Regulator Set IV

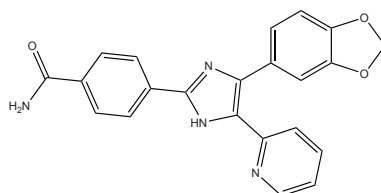

A convenient set of three small molecules that help in promoting the survival of embryonic stem cells (ESCs).

The three products are shown in the following table:

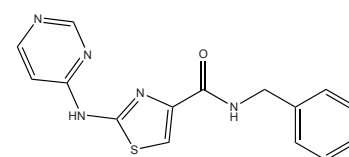

Product	Biological Activity	Cat. No.	Size
Pyrintegrin	Enhances human Embryonic Stem Cells (hESCs) survival.	1729-1	1 mg
Thiazovivin	Enhances human Embryonic Stem Cells (hESCs) survival.	1681-1	1 mg
Y-27632, 2HCl	Rho kinase inhibitor. Improves cloning efficiency of human Embryonic Stem Cells (hESCs).	1596-1	1 mg

PD 0325901

SB-431542

Thiazovivin
