

DiscoveryPak™ Stem Cell Fate Regulator Set V

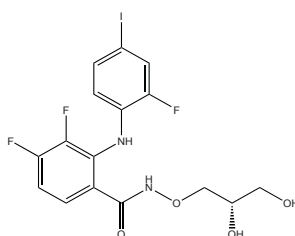

A convenient set of five small molecules useful for generating human induced pluripotent stem cells (iPSC) from primary cells.

The five products are shown in the following table:

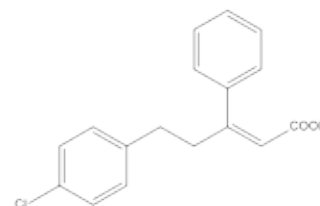

Product	Biological Activity	Cat. No.	Size
A83-01	ALK5 inhibitor	1725-1	1 mg
PD-0325901	MEK inhibitor	1643-2	2 mg
PS48	PDK1 activator	1869-5	5 mg
Sodium Butyrate	HDAc inhibitor	1609-1000	1 g
Tranlycypromine hemisulfate (Parnate)	Lysine-Specific Demethylase 1 (LSD1) inhibitor	1816-25	25 mg

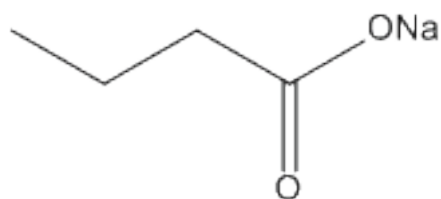

A83-01

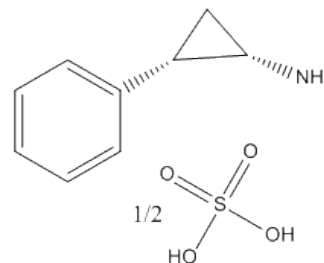

PD 0325901

PS48

Sodium Butyrate

Tranlycypromine hemisulfate (Parnate)
