

LABELS

Primary Antibody Fluorescent and Enzyme Conjugates

We offer our complete primary antibody portfolio conjugated to **13 different fluorescent dyes** as well as **biotin, streptavidin, alkaline phosphatase, and HRP**.

Conjugated primary antibodies are an excellent alternative to using a secondary antibody. A conjugated primary antibody is created by pre-attaching (conjugating) a tag of your choice (fluorophore, enzyme, or protein), to a primary antibody, allowing for visualization of your target protein without the need to purchase a costly secondary antibody.

Applications include: **WB, IHC, IF, ICC, Flow Cytometry, ELISA, and FRET**.

FREE ANTIBODY SAMPLES - Test any antibody for free before you buy!

Get Your Free Antibody Samples in 3 Easy Steps:

- 1. Find the antibody you would like to sample on our website**
 - If our datasheets do not indicate if an antibody is suitable for your application or species, please try a free sample.
- 2. Add the sample size vial (12 ug or 12 ul) to your cart**
 - Limit of 3 free antibody samples per research lab. Excludes conjugated and lyophilized antibodies.
- 3. Checkout online and just pay for shipping**
 - We cover the \$15 handling charge, and you just pay for shipping to your destination institution.
