

20-Hydroxyecdysone ELISA kit

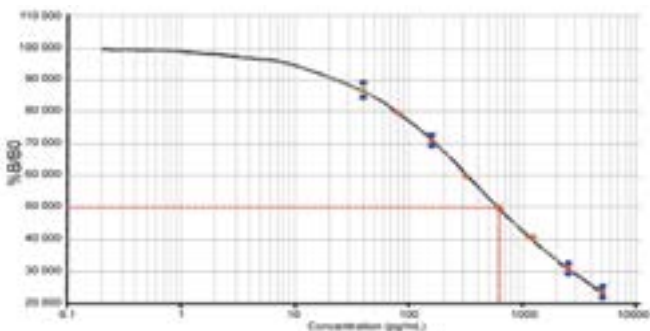

Discover our 20-Hydroxyecdysone ELISA kit for biological samples

- Measurement of 20-hydroxyecdysone in insects, arthropods, extracts, and other biological samples
- 34-sample assay in duplicate
- Measurement of 20-HE levels down to 31 pg/mL

20-Hydroxyecdysone (20-HE) is a naturally occurring **ecdysteroid hormone** that plays a critical role in regulating the molting and metamorphosis of **arthropods**. It is also studied for its potential anabolic effects.

- Sample volume : **50 µL**
- Standard curve range : **39 – 5000 pg/mL**
- Media application: Extraction with ethanol or methanol for biological samples like hemolymph, insect larvae...

Référence : 20-Hydroxyecdysone ELISA kit A05120

* This kit is widely used across renowned Academic and Governmental Research Institutes, Biotechnology and Pharmaceutical companies
