

Mucosal immunology

bringing innate immunity to the **next level**

Mucosal immunology

Hycult Biotech is a leading world-class manufacturer of research reagents in the field of innate immunity. We are a specialized partner in the development and manufacturing of assays, antibodies, proteins and peptides. With a focus on innate immunity, we pay special attention to products relating to antimicrobial peptides, complement, acute phase proteins, TLR, LPS and microbial toxins.

Mucosal immunology is the study of immune responses occurring in any surface that is in contact with the external environment. The intestines, respiratory tract and the urogenital tract all belong to the mucosal barrier. The mucosal immune system has three main functions: 1: it serves as the body's first line defense against pathogens, 2: it prevents systemic immune responses to commensal bacteria and food antigens, 3: it regulates appropriate immune responses to pathogens on a daily basis.

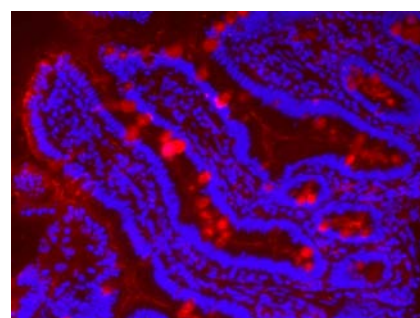

Validated ELISA kit sample types

BF:	Bronchoalveolar fluid	BM:	Breast milk
CF:	Cerebrospinal fluid	CS:	Cell culture supernatant
F:	Feces	P:	Plasma
S:	Serum	SP:	Sputum
TH:	Tissue homogenate	U:	Urine

Can't find the sample type you want for an ELISA kit?

Ask the support team to assist you with your research needs via support@hycultbiotech.com!

ZO-1 in human colon. Immunofluorescence with polyclonal antibody (Cat. # HP9056)

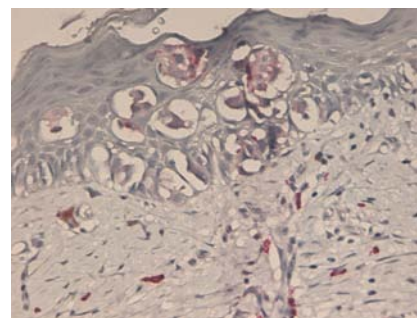

Looking for other products related to mucosal immunology?

We have more than ten folders that highlight different segments of our portfolio, such as complement, TLR and LPS!

How many tests would you like?

Almost all our ELISA kits are available in both a 1-plate and a 2-plate format!

ELISA kits for other species			
Product name	Species	Sample types	Cat. #
LBP	Mouse	CS P S	HK205
LBP	Various species	CS P S	HK503

SAP	Mouse	P S	HK215

Beta-3 integrin subunit in human melanoma. Staining of paraffin section with clone BV4 (Cat. # HM2035)

Validated antibody applications:

F: Frozen sections	FC: Flow cytometry
FS: Functional studies	IA: Immunoassay
IF: Immunofluorescence	IP: Immunoprecipitation
P: Paraffin sections	W: Western blot

Want to try different antibodies?

Use the sampler pack (Cat. # HM8999) to find the best antibody for your specific setup!
